

WATER PURIFICATION UNITS

A MOBILE ALL-IN-ONE SYSTEM

RAW WATER :

- Any available surface water and well including any sub surface water source and sea water.
- TDS value: max 45 000 ppm.

PRODUCE WATER :

- From 1 to 50 m3/hr for the containerized design.
- 2 m3/hr for the trailer mounted design.

PROCESS :

Each unit is designed according to the needs (pollutant type, pollutant load, requested produce water flow) :

- Physico-chemical treatment
- Filtration on various media ranges
- Reverse Osmosis
- Disinfection
- Remineralization.

CONFIGURATION :

Designed for industrial sites, onshore sites, military camps or emergency situations :

- Trailer mounted or containerized.
- Standalone operating with a power generator.
- Outdoor installation whatever weather conditions.
